The 2009 actual power mix shown above represents the resource makeup of renewable electricity (kilowatt-hours) purchased in Alliant Energy's Second Nature program. Alliant Energy's 2009 total electric energy mix contains the following resources: coal (49%), purchased power (48%), natural gas (2%) and wind (1%). (Modified: 2/04/2010)

<sup>1</sup> These figures reflect the nameplate kilowatt-hour capacity of the power that we expect to generate and/or have contracted to provide. Actual figures may vary according to resource availability.

<sup>2</sup> New Renewables are generation facilities in operation on or after January 1, 1997.
